in Saxony-Anhalt

PAGES 8

SUPPLEMENT

25X1A

25X1X

SOURCE: The following lists, showing production in 25 Soviet AG chemical and heavy-industry plants in Saxony-Anhalt from January to May 1947. These factories make up seventy per cent of the total number of SAG plants in Saxony-Anhalt and forty per cent of those in the Russian Zone.

1. Chemie-Werk Leuna, Merseburg

|                             |                  |                        |                   |
|-----------------------------|------------------|------------------------|-------------------|
| Calcium, dry                | 29,804 tons      | Nitrogen for the Buna  | 35,400,000 cu. m. |
| Sulphur                     | 2,704 tons       | factory                |                   |
| Ammonium chloride           | 8 tons           | Ammonia for Bitterfeld | 17,980 tons       |
| Manganese oxide             | 136 tons         | Ammonia for Leuna      | 26,500 tons       |
| Hydroxide ammonium sulphate | 3 tons           | "Kontakt 5058"         | 84 tons           |
| Bottled oxygen              | 267,954 cu. m.   | Hydrogen for the Buna  |                   |
| a-oxynaphthol acid          | 3 tons           | factory                | 14,377 cu. m.     |
| p-oxynaphthol acid          | 1 ton            | Ammonium sulphate      | 25,154 tons       |
| Phenol oil                  | 139 tons         | Alcacide lye           | 270 tons          |
| Monomethyl amine            | 31 tons          | Methanol               | 4,561 tons        |
| Caprolactate                | 188 tons         | Phenol                 | 599 tons          |
| Dimethyl ether              | 171 tons         | Cresol                 | 994 tons          |
| Washi powder                | 440 tons         | Xylenol                | 246 tons          |
| "Milana"                    | 25 tons          | Dimethyl amine         | 52 tons           |
| "Acinetten"                 | 1,410 kg.        | "Nupasin"              | 1,306 tons        |
| "Samex"                     | 11,575 kg.       | "Mersolat"             | 59 tons           |
| Mitranol                    | 3,939 kg.        | "Mereinit"             | 110 tons          |
| Fuel gas for Buna           | 5,323,000 cu. m. | Glue                   | 103 tons          |
| "Aldrekal"                  | 1,160 kg.        | "Meleusol"             | 22,000 kg.        |
|                             |                  | "Ractor"               | 150 kg.           |
|                             |                  | Baking powder          | 128 tons          |

2. Chemie-Werk Buna, Schkopau (D 91)

|                   |            |                   |          |
|-------------------|------------|-------------------|----------|
| Chlorine          | 7,703 tons | Acetone           | 280 tons |
| Hydrochloric acid | 1,653      | Methyl acetate    | 509      |
| Soda lye          | 8,798      | Butyl acetate     | 245      |
| Aluminum chloride | 149        | "Butanol"         | 901      |
| Calcium carbide   | 67,989     | Trichlorethylene  | 1,311    |
| Acetylene         | 22,084     | Ethylene chloride | 120      |
| Alcohol           | 2,251      | Ethylic           | 16       |
| Ethyl acetate     | 307        | Solvent E         |          |
